Quality products from  
Swedish forests

## About us

Established in 1945, ATA Timber is a family-owned business located in South Sweden producing sawn wood products and BCTMP pulp.

The group comprises six sawmills with an annual combined production of approximately 500,000m<sup>3</sup> and a state-of-the-art pulp mill, manufacturing in advance of 200,000 tonnes per annum.

ATA also manages its own independent log procuring business, sourcing the finest quality local raw material from the most sustainable forests in Southern Sweden.

The majority of timber production is exported to Europe, with the UK in particular having developed into an increasingly important timber market. The strategic and commercial benefits of expanding its UK business were recognised in 2020 when the owners of ATA opened a dedicated stock facility in the port of Sheerness, Kent.

## Group sawmills

ATA Timber mainly produces finished goods for the UK, US, Swedish, Dutch and Danish constructional/merchant sectors.

The raw material is predominantly locally sourced spruce, which is the preferred choice for those industries that require high quality fibre.

ATA's sawmills are strategically located in Southern Sweden, comprising seven saw lines, eight planning lines, seven progressive kilns and 36 chamber kilns sited at six modern and efficient production units.

<b>Moheda</b>	150,000 m <sup>3</sup>	Mostly C24 and battens
<b>Åboda</b>	50,000 m <sup>3</sup>	Sawn red/white
<b>Eneryda</b>	50,000 m <sup>3</sup>	Sawn red/white
<b>Rörvik</b>	100,000 m <sup>3</sup>	Sawn joinery quality red/white
<b>Sandsjöfors</b>	75,000 m <sup>3</sup>	Stud mill mostly CLS and C24
<b>Widtsköfle</b>	75,000 m <sup>3</sup>	Mostly C24

ATA also has access to extensive timber treatment facilities, located in its main loading port at Karlshamn in Southern Sweden.

## Product range at Sheerness Terminal

Our comprehensive inventory at the port of Sheerness includes the following product range:

**UC2 treated C24**

**Untreated C24**

**CLS**

**BS5534 battens**

**Type "A" battens**

Other timber products are available.

# Logistics

We have one to two sailings per month from the port of Karlshamn into our UK stock facility at Sheerness.

We use a local haulage provider that offers a 24-72 hour delivery service to most destinations within the UK mainland.

Our experienced team will take care of all of your stock requirements to ensure that goods will be supplied in full and on time.

## Environmental

Forest regeneration is vital to preserve sustainability in the Swedish forests. We work closely with local forest owners and the majority of our raw material comes from forests that have been nurtured for generations by our suppliers.

ATA timber also facilitates extensive planting of approximately 3,000,000 saplings per year. By managing the logistics chain from forest to sawmill, as well as operating the production units, ATA Timber guarantees a process which is sustainable and efficient, adding value to our clients.

Furthermore, we can provide the added assurance that all our goods come with the benefit of both PEFC and/or FSC accreditation.
